

The Industry Standard for Business Management Software in One Complete Package

Increasing fuel costs. Shifting regulations. Mounting competition. As a business in the scrap management industry, your success depends on how well you can manage your limited resources while quickly adapting to marketplace changes. EnCORE™ gives your organization a competitive edge, streamlines operations, and frees you up so you can focus on what you know best—running your business.

Experience and Professionalism

With over 20 years of experience in the Recycling and Scrap Industry, EnCORE is becoming a leader in Scrap and Recycling software. EnCORE is a complete Microsoft turnkey solution specifically designed for managing all aspects of the Recycling and Scrap industry. All the features listed below are included in our software for one price. Most importantly, we do not deploy our software by module. One package, one price!

- EnCORE is built on the latest Microsoft programming language, .NET and based on the Microsoft SQL platform
- Extremely well designed with a easy to use graphical interface
- Robust reporting utilizing Business Object's Crystal Reports
- Customer Management, Electronic Payables / Billing and Email Integration
- Advanced Sales & Bonus Management Tracking
- Accounts Receivable & Accounts Payable
- Brokerage and Freight Tracking
- Touch Screen Truck & Rail Scale Management
- Platform Scale Management
- Multiple Material Sales
- Handheld Inventory & Picture Inspection System
- Recycling Management AP,AR and MRF Management
- Recycling Inventory Management
- Fleet & Equipment Management & Maintenance
- Sales Orders, Shipments and History

Purchase Plan Management

Take full control of your commodity procurement . Always know your raw material requirements and their fulfillment status. Purchase Plan Management includes :

- Actual and Estimated Weights, land cost by material, freight and handling charges
- Purchase Order status and In-Transit Shipments
- MTD actual verses estimated consumption by material
- Project of purchase costs based on orders still outstanding which also includes anticipated freight and handling charges.
- Inventory status by grade with tonnage and landed cost.

Settlement Analysis

EnCORE helps businesses address and simplify the process of analyzing the profitability of one multi-material non-ferrous transaction. In addition, we can apply settlement grades, weight differences and prorate freight costs over several materials by weight.

Simple, Yet Robust

EnCORE was built from the ground up with two things in mind: make the software easy to use and complete. Whether you are running a small recycling operation or a multi-location recycling enterprise, EnCORE has you covered. With features such as customer management, material management, inventory control, split ticketing, scale management, and much more, EnCORE provides the “one two punch” to help you get your business under control for increased efficiency and bottom line.

Scale Management

Track your business as never before with EnCORE’s powerful, yet flexible scale management utility. EnCORE’s has an easy to use touch screen control so that your Scale Master will experience quick and accurate weighing. Have multiple scales? Not a problem, EnCORE can connect to two scales at one time. Virtually eliminate long lines at your scales with EnCORE an easy to use Scale Master touch screen interface.

Easily track origins or breakdown origins, adjust loads for moisture and other contaminants in the click of a button.

Inventory Control

Need to manage inventory of materials? We do that too! EnCORE manages materials brought inbound and outbound at your facility. We also track tonnage, cost and profitability of materials.

PO Management

EnCORE provides PO Management like you have never seen before. Create and manage PO numbers by contract, scale ticket, and customer with ease.

Customer Management

EnCORE’s Customer Management provides complete tracking of your customers including site and bill to demographics, financial history, pricing, routing, equipment, contracts and customer comments. Manage your customer accounts like never before with detailed and organized information at your figure tips.

Security

Looking for a way to systematically manage user’s access to the system? EnCORE security utility’s provide access by company, group and job description. With access removed, users will not be able to access these particular capabilities in the system.

Reporting and Analysis

EnCORE contains powerful standard reports for detailed analysis of your business in order to help you make important decisions. Have report writing experience? The EnCORE Report Expert lets you make the changes and create your own reports from SQL views. The power is now in your hands!
